

BBL

TRANSPORT

Ship Forwarding

Thanks to its growth and development, BBL has quickly given itself the means to its ambitions in the world of **international transport**.

With the successive installing of subsidiaries, first in Le Have, then thanks to external growth in Marseille, Lille and Antwerp, BBL Fransport has given a new dimension to its ship transport abilities.

We have taken this strategy one step further with the opening of the Rotterdam agency in March 2008, in **one of the largest freight harbor of the world**.

The **Marseille** agency aggregates all the shipping activities of South Western France up to Lyon, including the Provence-Alpes-Côte d'Azur region, Switzerland, Italy, Northern Spain and North Africa

The agency in **Le Havre** enables to manage the freight for the Paris region and North Western France.

The **Lille ? Antwerpen ? Rotterdam** triangle manages the flows from and to Paris, North Eastern France, Belgium, the Netherlands, Germany, Luxemburg and Switzerland.

In the case of agency in **Istanbul**, it concentrates all the shipping from the turkish market.

We also use the agencies of Paris and Lyon as ?relays? as customer services, dedicated to the two biggest economic regions in France.
