## TRANSPORT

Thanks to its growth and development, BBL has quickly given its ambitions in the world of **international transport**.

**With the successive installing of subsidiaries**, first in Le Havre, then in Marseille, Lille and Antwerp, BBL Transport has given its clients a wide range of shipping transport abilities.

We have taken this strategy one step further with the opening of a new subsidiary in March 2008, in **one of the largest freight harbor of the world**.

The **Marseille** agency aggregates all the shipping activities of the region from Lyon to the Mediterranean, including the Provence-Alpes-Côte d'Azur region, Switzerland, Spain and North Africa.

The agency in **Le Havre** enables to manage the freight for the entire Western France.

The **Lille ? Antwerpen ? Rotterdam** triangle manages the flow of goods between Eastern France, Belgium, the Netherlands, Germany, Luxembourg and the UK.

In the case of agency in **Istanbul**, it concentrates all the shipping activities for the region.

We also use the agencies of Paris and Lyon as 'relays' as customers are located to the two biggest economic regions in France.
