

Organisation

Founded in 1997, the BBL Group has managed to **expand** and **adapt** to its environment, while keeping its original values..

As an Eastern Europe expert, the firm has lead external growth operations over the last 3 years in order to gain a **better meshing** of the national and European territory and to widen its range of services..

Thanks to its **integrated multimodal network**, BBL now offers road, rail, sea and air transport as well as logistic and customs services.

The firm also has several logistic platforms that enable a rational organisation of the traffic streams.
